

Easy-Cut

A New Generation of General Purpose Bandsaw Blades from Bahco

3857 Sandflex® Easy-Cut

Simple solutions, sharper thinking

**Nobody has
made sawing
so easy!**

Easy-Cut – A New Generation of General Purpose Bandsaw Blades from Bahco

Easy-Cut – We have named our new generation of general purpose band saw blades Easy-Cut for a very simple reason; it really does make metal cutting easy.

Whether you're cutting ferrous or non-ferrous materials, solids, pipes, profiles or bundles, Easy-Cut is the blade for you. No longer need you worry about teeth per inch, tooth type or set, just choose the blade according to your work-piece size - small, medium or large. It really is that easy.

Why is it so easy? We have developed a unique, innovative tooth design which allows a much wider operating range than a conventional tooth type. This means that the same blade will cut a much wider range of materials and shapes;

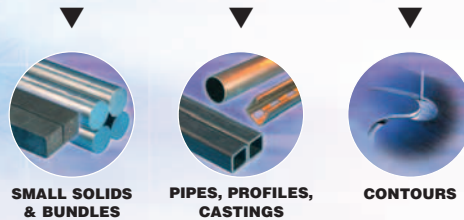

- Saving you money
- Saving you time

Easy to Cut

Our patented revolutionary tooth design enables Easy-Cut to cut a whole variety of materials, including:

- Mild steel, Stainless Steel and Tool Steel
- Non-ferrous materials, including aluminium, copper, brass and even plastics

And also many different shapes:

all without changing the blade!

But Easy-Cut's strength is not just in its versatility, the new tooth design means it is strong and resistant to tooth stripping. M42 tooth tips give good heat resistance and ensure maximum performance.

Easy to Order

There is no need to know what type of machine you use, what material you are cutting or what shape the material is. All we need to know is the blade length, the thickness and whether you are cutting Small (S), Medium (M) or Large (L) work-pieces (see table below).

It couldn't be easier! Easy-Cut.

EASY-CUT – Cutting Data

Order Code	Blade Size Width x Thickness	Material Size													
		1mm	2mm	3mm	5mm	10mm	20mm	30mm	40mm	50mm	75mm	100mm	150mm	200mm	
3857-13-0.6-EZ-S	13 x 0.6	[Bar chart showing range from 1mm to 20mm]													
3857-13-0.6-EZ-M	13 x 0.6	[Bar chart showing range from 2mm to 40mm]													
3857-13-0.6-EZ-L	13 x 0.6	[Bar chart showing range from 3mm to 75mm]													
3857-20-0.9-EZ-S	20 x 0.9	[Bar chart showing range from 2mm to 50mm]													
3857-20-0.9-EZ-M	20 x 0.9	[Bar chart showing range from 3mm to 100mm]													
3857-20-0.9-EZ-L	20 x 0.9	[Bar chart showing range from 5mm to 150mm]													
3857-27-0.9-EZ-S	27 x 0.9	[Bar chart showing range from 3mm to 75mm]													
3857-27-0.9-EZ-M	27 x 0.9	[Bar chart showing range from 5mm to 150mm]													
3857-27-0.9-EZ-L	27 x 0.9	[Bar chart showing range from 10mm to 200mm]													
3857-34-1.1-EZ-S	34 x 1.1	[Bar chart showing range from 5mm to 100mm]													
3857-34-1.1-EZ-M	34 x 1.1	[Bar chart showing range from 10mm to 150mm]													
3857-34-1.1-EZ-L	34 x 1.1	[Bar chart showing range from 15mm to 200mm]													

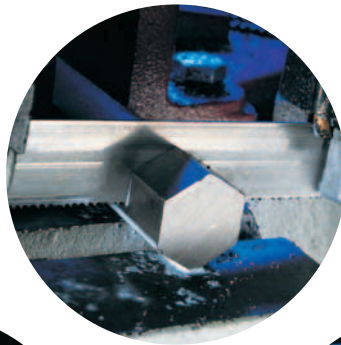

Within any size range

Small = Good surface finish

Medium = Good band life

Large = Speed of cut

- Easy blade selection
- No need for TPI choice
- Wider operating range than conventional blades
- Simply choose material size and blade size
- Unique, innovative patented tooth design
- Cuts mild steel, stainless steel, tool steel and non-ferrous materials including plastics
- Easy to order
- Available through our Worldwide Distribution Network
